- Understanding of software testing principles and experience in writing unit tests to ensure code quality.

Project Details

E- Commerce

Hayneedle

Oct - 2023 - Till Date

Hayneedle began in 2002 when Doug Nielsen, Julie Mahloch and Mark Hasebroock purchased a single online store, Hammocks.com, from a llama farmer in rural Washington state. Over the next few years, the company opened more online stores, each focused on one particular type of product, developing a portfolio of sites focused on indoor and outdoor home furnishings, accents, and decor.

In 2005, the company unified under the name NetShops, and continued its category expansion.

Responsibilities

- Designing, developing, testing, and maintaining software applications using the .NET framework and related technologies.
- Collaborating with cross-functional teams, including project managers, designers, and other developers to identify requirements and deliver high-quality software solutions.
- Writing clean, efficient, and maintainable code that adheres to best practices and design patterns. Troubleshooting and debugging software issues and providing technical support as needed. Developing and consuming RESTful web services and API integrations to interact with third-party systems.
- Designing and implementing relational databases using Microsoft SQL Server or Oracle.
- Developing web applications using ASP.NET, MVC, Web API, HTML, CSS, and JavaScript.
- Familiarity with desktop application development using C++. Understanding and applying Agile software development methodologies to manage project tasks, timelines, and resources.
- Familiarity with DevOps practices and tools such as Jenkins and Docker to automate software builds and deployments.
- Ability to learn and adapt quickly to new technologies and programming languages as required. Strong communication and interpersonal skills to effectively collaborate with cross-functional teams and stakeholders

Skills

- React
- CSS
- JavaScript
- HTML
